

SCAMPISM Training

This SCAMPISM training will prepare members of your staff to perform as a team member using the SCAMPISM method. The objective of this training is to prepare students to effectively participate as team members. This includes understanding appraisal planning, objective evidence data collection and consolidation, and documenting and reporting appraisal results.

This course uses lectures, exercises, and a guided case study that simulates an actual appraisal. It is highly interactive and is delivered in a team-based environment. This format helps participants develop appropriate skills and confidence in applying their skills during an actual appraisal. Students use our automated tool, Appraisal Wizard[®], to further facilitate the learning experience. This course is taught modularly using lectures, discussion, guided exercises, and case studies. Participants will receive read-ahead material and homework assignments.

This course is delivered using Software Engineering Institute (SEI) licensed course materials and a SEI Authorized Lead Appraiser.

Course Content*

*The course is composed of lectures, class exercises and a case study with opportunity for participant questions and discussions.

- Understanding the Appraisal Framework;
- Learning about the SCAMPISM;
- Developing Critical Skills;
- Planning and Preparing for your Appraisal;
- Practicing Interviewing Skills and Techniques;
- Analyzing and Validating Data;
- Preparing and Delivering Findings Presentations;
- Performing the Rating Rules and Process;
- Documenting Appraisal Results.

Course Duration

- 2 days
- This class is presented in both public and client site forums

Prerequisites

Participants must have attended the SEI's Introduction to CMMI[®] V1.2

Material Provided

- Presentation hard copy and exercise materials
- Reference Material
- Certificate of Completion (upon full attendance)

Who Will Benefit

- Prospective appraisal team members (including team alternates)

Client Site Logistics Requirements

- LCD projector and screen
- Flip charts
- Classroom for 10 participants and 1 instructor
